

LOVE2BREW

OCEANIA PALE ALE (EXTRACT)

Inspired by the land down under we've collected two of our favorite hops from Australia and New Zealand and smashed them together to create this aggressively hoppy pale ale. This golden ale starts with BIG aromatics that will remind you of mango, passion fruit, and tropical fruit intertwined in a melody that is an experience for the senses. Late hop additions reduce bitterness and focus on the flavor combination of tangy berries and a slight white wine taste in the finish. Supporting all of this hop flavor is a soft malt backbone that helps to round out this beer perfectly. The Oceania Pale Ale pairs great with food and sure to be a hit amongst friends and family!

KIT STATISTICS

- 2 Weeks Primary Fermentation
- 1 Week Secondary Fermentation
- 2 Week Bottle Conditioning
- Original Gravity: 1.063
- 6.4% ABV (Estimated)
- IBUs: 66.6
- SRM: 6.4 (Gold)
- 30 Minute Boil

HOMEBREW KIT CONTENTS

Malts & Specialty Grains

- 7 lbs. Pilsner Malt Extract
- 1 lb. Caramel 10L
- 8 oz. Golden Naked Oats

Hops

- 2 oz. Nelson Sauvin (Flavor)
- 3 oz. Galaxy (Aroma)
- 1 oz. Nelson Sauvin (Aroma)
- 1 oz. Galaxy (Dry Hop)
- 1 oz. Nelson Sauvin (Dry Hop)

Yeast Choices

- Safale US-05
- Nottingham Ale Yeast
- California Ale Yeast (WLP001)

Other

- 5 oz. Priming Sugar
- 1 Mesh Grain Bag

EQUIPMENT:

- Brew Kettle (3.5+ gallon capacity)
- Thermometer & Hydrometer
- 2x Fermentation Vessels
- Stirring Spoon
- Airlock
- Blow off tubing
- Bottles
- Racking Equipment
- Sanitizer

GETTING STARTED:

- If you haven't already done so read the "Basic of Brewing" guide included in your equipment kit.

- Read over the entire contents of this recipe before you brew. This will help avoid any errors. You are adding the malt extract in two separate additions for this batch.

- Upon receiving your kit refrigerate your yeast. One day before your brew day remove your yeast from your refrigerator and allow it reach room temperature. (~70°F)

- Clean and Sanitize all equipment thoroughly; poor sanitization could ruin an otherwise perfect batch.

- Crush grains: Many of our grains come pre-crushed; however it never hurts to examine your specialty grains first. If un-crushed simply using a rolling pin to crush grains.

- You'll need approximately 2 hours to complete this brew. Schedule accordingly.

- Homebrew (To enjoy in moderation while brewing)*

*Optional

BREW YOUR BEER

1. Add 3 gallons of water to your boil kettle. Bring the water to 155°F.
2. Pour specialty grains into the mesh bag and steep for 30 minutes. We recommend turning the heat a little lower during this phase; you do not want the water to heat over 170°F.
3. After 30 minutes remove steeping grains from water. Allow grains to drain but *do not* squeeze or press bag to wring out excess water.
4. Bring water to a boil.
5. Add 7 lbs. Light Malt Extract. Stir.
6. At this point your mixture is now wort (pronounced “wert”; defined as unfermented beer). Allow your wort to return to a boil. Be sure to observe your boil so as to avoid a messy boil-over.
7. Once the foaming subsides begin your 30 minute boil process. Timing is referred to by minutes left in the boil.
8. 30 Minutes: Add 2 oz. of Nelson Sauvin for flavor.
9. 15 Minutes: Add 2 oz. of Galaxy for aroma.
10. 5 Minutes: Add 1 oz. of Nelson Sauvin for aroma.
11. 0 Minutes: Add 1 oz. of Galaxy hops for aroma at end of boil and steep as you cool your wort.
12. After your wort is done boiling it is very important you cool it as quickly as possible to avoid potential infections. Create an ice bath (ice and water) in your sink and set the brew kettle in it. You need to cool your wort down to 90°F or lower.

COOLING / TRANSFERRING

1. By now all of your equipment should be already sanitized; if not sanitize your screw cap, fermenting vessel, airlock, siphon, and tubing.
2. Fill your primary fermentor with 1 gallon of cold water.
3. Pour your cooled wort into the primary fermentor. Avoid dumping the sludge on the bottom into your fermentor.
4. Add cold water as needed to bring wort up to 5 gallons of liquid ensuring that it is below 70°F.
5. Seal the fermentor and aerate the wort by rocking the fermenting vessel back and forth a bit. Other options include using an aeration system or diffusion stone.
6. Measure Specific Gravity of the wort with your hydrometer and record.
7. Add yeast to fermenting vessel. It is important that the wort temperature not be above 70°F when adding the yeast.
8. Seal the fermentor. Add an airlock or blow-off tube.

FERMENTING

1. Move fermenting vessel to a room temperature dark spot (approximately 68°F).
2. You will observe active fermentation within about 48 hours. You want to maintain the temperature of approximately 68°F.
3. After about 1-2 weeks your active fermentation will stop. At this point if you have a blow off tube attached you may remove it and add an airlock to the vessel.
4. After 2 weeks transfer your beer to the secondary fermentor. Transferring is as simple as siphoning from the primary to the secondary.
5. After you have transferred your beer to the secondary fermentor add 1 oz. of Nelson Sauvin and 1 oz. Galaxy Hops to dry hop.
6. After 3-7 days of secondary fermentation you are ready to bottle or keg your beer.

BOTTLING / CARBONATING

1. Sanitize your bottles, bottle caps, bottling bucket, siphon tubing, siphon, and bottling wand.
2. Add priming sugar to 16 oz. of water and bring the mixture to a boil using your stove. Let cool and add to your bottling bucket.
3. Gently siphon beer into bottling bucket; avoid splashing.
4. Fill and cap bottles.
5. Condition bottles for 2 weeks at room temperature.
6. After 2 weeks you may store the bottles in a cool/cold location if carbonated.

ENJOY!

1. Pour your homebrew into a clean glass. For aesthetic reasons many people avoid pouring the yeast in but it won't hurt you!
2. Smell the beer, a few short sniffs. Taste. Allow beer to cover the tongue, swallow. Smile. Life is good.

If you have any questions while brewing your beer call us at 1.888.654.5511 or email support@love2brew.com. We're open 7 days a week to help you brew the best beer possible!
