

# LOVE2BREW

## CALIFORNIA COMMON (ALL-GRAIN)

California Commons are a true piece of the United States brewing history, this copper lager beer was fermented at room temperatures by western settlers looking for an excellent beer but without the proper resources for cold fermentation. Showcasing the aroma and flavors of the moderately bitter US Northern Brewer hop you'll enjoy a rustic, woody characteristic that plays incredibly well with the caramel and slight toast notes from our carefully selected malts. If you're a fan of Anchor Steam lager then this brew is an excellent choice to share and enjoy with friends and family.

### KIT STATISTICS
